AIM

ASSAM'S PURPOSE

Based on the idea that the prosperity of Muslim Nations, the survival of the states they established, the establishment of peace in the world and the dominance of justice are possible with the emergence of Islamic Countries on the world political stage as a superpower; to carry out intellectual studies that will provide;

- 1) Muslim States; Creating a database regarding national power elements for each of them,
- 2) Conducting individual and joint internal and external threat assessments,
- 3) Determination of internal and external security plan principles and establishment and development of institutions needed to gather under a common will and the principles of organization of these institutions,

PURPOSE OF ASSAM CONGRESSES

ASSAM Congresses; To make determinations on an academic and political basis regarding current problems in world politics, especially the Geography of Islamic Countries; to propose solutions to international, regional and local crises; To determine the necessary institutions for the gathering of Islamic Countries under one will and to create the necessary legislative models for these institutions; It aims to present a solution to the Islamic World and decision makers.

The First Series of ASRICA Islamic Union Model International Congresses was held as a series of seven international congresses between 2017 and 2023.

As a result of the seven congresses held, **the necessary institutions for the Islamic Countries to form a Union were studied, and a legislative model and a model constitution for these institutions were established.** The studies have been published on international platforms and at <https://assam.org.tr> and <https://assamcongress.com>

GENERAL EVALUATION

GEOPOLITICAL VALUE OF ISLAMIC GEOGRAPHY

57 of the 206 States in the World (27% of the member states), 1,859,779,580 of the 7,916,525,000 world population (23.49% of the world population), the Islamic geography, which is owned by 57 Islamic Countries, covers 30.9 million km² (20.6% of the lands of the whole world) of the world's 150 million km², with the bloc they formed when the borders between them are ignored:

- Which is located in the **center of the continents of Asia, Europe and Africa**, known as the world island,
- **Which is controlling the Gibraltar, Bab El-Mendeb, Hormuz, Çanakkale and Istanbul straits and the Suez Canal**, which are considered the gateways to the Mediterranean, Red Sea and Black Sea, which is the world's largest inland seas,
- Which have coasts to the **Atlantic Ocean, Indian Ocean, Mediterranean, Black Sea, Red Sea and Caspian Sea**,
- **Which is bordered by land and sea to the continents of Asia, Europe and Africa, to the global powers of the world such as the European Union, Russia, India and, China, and to the United States by sea**,
- Which have the opportunity to be the **center of the land, air and sea transportation routes** without alternatives,
- Which owns 55.5% of the world's **oil reserves**, 45.6% of its **production** also 64.1% of **natural gas reserves**, 33% of its production,

By combining its geopolitical position, common civilization values and historical background with its opportunities, efforts and goals, it has the potential to become the superpower of the future.

Map 1 Model ASRICA Islamic Countries Confederation Geography

GLOBAL ATTACKS TO THE ISLAMIC WORLD

In its geography where it should be sovereign, the **Islamic world** has become the site of the **undeclared, secret, insidious, dirty and asymmetric World War III**, in which the ethnic and sectarian units within the unitary structures of each Islamic country are fighting each other.

Despite the advantages they have, Islamic countries have fallen into a great turmoil with the interventions of the imperialist western states. As a result of this turmoil, great suffering and destruction are experienced in the Islamic countries. Millions of Muslims are forced to choose between leaving their homes or dying. Thousands of Muslims die in various ways on the migration routes, and those who manage to migrate are doomed to live in poverty and misery.

According to the official data of the United Nations High Commissioner for Refugees, as of 2021, according to official records, 6.6 million Syrian citizens immigrated around the world. This figure is even higher with unregistered refugees. Syrian refugees migrated to Türkiye (3,388,698), Iraq (262,218), Jordan (660,605), Egypt (145,157), Lebanon (805,326) and other countries in North Africa (41,742). Apart from these figures, there are intense attempts to migrate to Europe and most of them lose their lives in the Mediterranean. Despite these adversities, the total number of registered refugees crossing into Europe from April 2011 to January 2021 was 1,022,142.

www.assam.org.tr

The World War III is being waged as an undeclared war (hybrid war) against Islamic countries. After the collapse of the Ottoman Empire, the Muslims, who were left without a government, tried to continue their existence by establishing small states, but because they lost their unity and solidarity, they became an easy to swallow for global powers. **The United States, European Union, England, France, Russia and China aim to establish authority in Islamic countries by waging proxy wars with the terrorist organizations they control and the asymmetric war methods they apply in order to seize the Islamic geography.**
